

Amend of bidding documents of Network Security Devices .				
S/L	Annexure / Page No/	Item /Section	Existing info	Amended Info
1	Terms and Conditions , Page : 01	1.1 Scope of bid	Not mention	10. 2 ( Two ) Sandboxing Solution ( Zero-Day Threat prevention ).
2	Next Generation Firewall for Data Network Security	Interface	Hardware Specifications : Processor : Multi-core non-ASIC Processing Technology	Hardware Specifications : Processor : Multi-core Processing Technology (Mention by Bidder )
3	Same as Above	IPSec Client	Multilingual: German, English and French	Multilingual: English and any other mention by bidder.
4	Same as Above	Warranty and Supp	Free Consultation from OEM's Senior Technical Support Engineer (Minimum 3 hrs) during installation & configuration	Free Consultation from OEM's Senior Technical Support Engineer during installation & configuration onsite or offsite . ( Same requirment will applicable for all the proposed devices in the Tender )
5	Same as Above	Vendor Report	Not mention	Please provide recent two Gartner and NSS lab report for proposed device . ( Same requirment will applicable for all the proposed devices in the Tender where applicable )
6	Sandboxing Solution ( Zero-Day Threat prevention )	Feature	2. Internationally reputed top five (05) brand (Leader / Challenger) of Gartner Magic Quadrant Report in 2014/2015/2016	Please provide recent two NSS lab report for proposed device .
7	Same as Above	Feature	10.Appliance should have power supplies option for AC or DC. Currently need only AC	10.Appliance should have power supply for AC .
8	Same as Above	Feature	11. Appliance should have 2 x 12 Core CPU and 512GB RAM for better and faster performance	11. Appliance should have support Minimum 1500 number of files analyzed per day .
9	EMAIL SECURITY	Brand	Internationally reputed top five (05) brand (Leader / Challenger) of Gartner Magic Quadrant Report in 2014/2015/2016	Internationally reputed top five (05) brand (Leader / Challenger) of NSS or Gartner Magic Quadrant Report in 2014/2015/2016.
10	Same as Above	Appliance Requirement and Functionality	Currently require Anti-spam, Anti-virus, outbreak filter, for 300 users from day one	Currently require Anti-spam, Anti-virus, outbreak filter for 3000 users from day one. Solution should be upgradable to 5000 Users in future .
11	Web Security	Appliance Requirement and Functionality	The solution should be a hardened Web Proxy, Caching, Web based Reputation filtering, URL filtering, Antivirus and Anti-malware Virtual appliance. All the functionalities should be in a single appliance only. License for 200 users should be included.	The solution should be a hardened Web Proxy, Caching, Web based Reputation filtering, URL filtering, Antivirus and Anti-malware Virtual appliance. All the functionalities should be in a VM base single appliance only. License for 1000 concurrent users should be included from day one .Solution should be upgradable to 3000 Users in future .
12	Web Security	Not Mention	Not Mention	Vendor can quote web security solution seperately or combined solution with Internet firewall or Web Application firewall . But solution should compitable with our Web Security RFP .
